

F. 2050 Goals & 2030 Milestones

2050 Goals

A: The integrity of all ecosystems is enhanced, with an increase of at least 15% in the area, connectivity and integrity of natural ecosystems, supporting healthy and resilient populations of all species, the rate of extinctions has been reduced at least tenfold, and the risk of species extinctions across all taxonomic and functional groups, is halved, and genetic diversity of wild and domesticated species is safeguarded, with at least 90% of genetic diversity within all species maintained.

B: Nature's contributions to people are valued, maintained or enhanced through conservation and sustainable use supporting the global development agenda for the benefit of all

C: The benefits from the utilization of genetic resources are shared fairly and equitably, with a substantial increase in both monetary and non-monetary benefits shared, including for the conservation and sustainable use of biodiversity.

D: The gap between available financial and other means of implementation, and those necessary to achieve the 2050 Vision, is closed.

2030 Milestones

A.1 Net gain in the area, connectivity and integrity of natural systems of at least 5%.

A.2 The increase in the extinction rate is halted or reversed, and the extinction risk is reduced by at least 10%, with a decrease in the proportion of species that are threatened, and the abundance and distribution of populations of species is enhanced or at least maintained

A.3 Genetic diversity of wild and domesticated species is safeguarded, with an increase in the proportion of species that have at least 90% of their genetic diversity maintained.

B.1 Nature and its contributions to people are fully accounted and inform all relevant public and private decisions

B.2 The long-term sustainability of all categories of nature's contributions to people is ensured, with those currently in decline restored, contributing to each of the relevant Sustainable Development Goals.

C.1 The share of monetary benefits received by providers, including holders of traditional knowledge, has increased

C.2 Non-monetary benefits, such as the participation of providers, including holders of traditional knowledge, in research and development, has increased.

D.1 Adequate financial resources to implement the framework are available and deployed, progressively closing the financing gap up to at least US \$700 billion per year by 2030.

D.2 Adequate other means, including capacity-building, technical and scientific cooperation and technology transfer to implement the framework to 2030 are available and deployed

D.3 Adequate financial and other resources for the period 2030 to 2040 are planned or committed by 2030.
